

(a) Latent action models

Which reconstruction target yields transferable actions?

(b) NWM pretraining

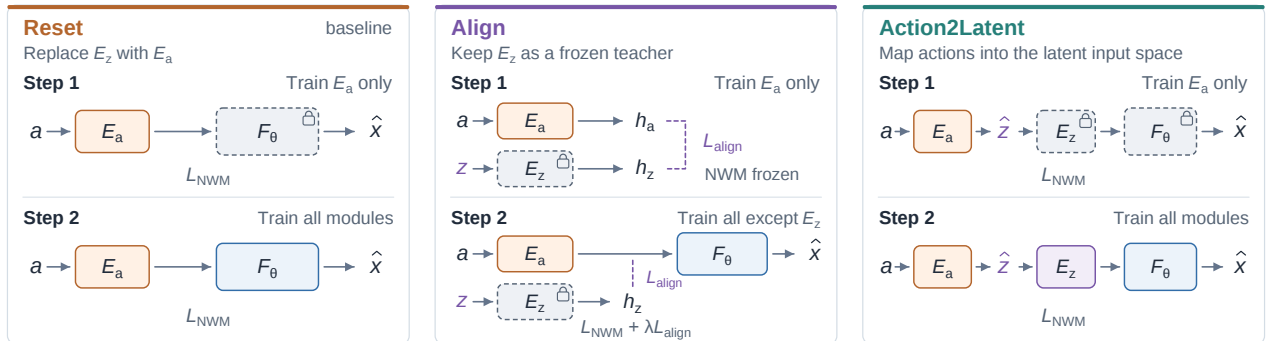

Which pretraining signal transfers best?

(c) Two-stage fine-tuning

From nwm-latentpt · supervised on Base data

 Trainable Frozen Lock

Training-only teacher in Align; Action2Latent retains E_z at inference. Visual / diffusion inputs are omitted in (c).

EVALUATION Visual prediction · Navigation planning · Unseen-domain generalization
