

(c) Two-stage fine-tuning

From nwm-latentpt · supervised on Base data

Trainable Frozen Lock

Reset

Replace E_z with E_a

baseline

Step 1

Train E_a only

Step 2

Train all modules

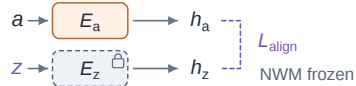

Align

Keep E_z as a frozen teacher

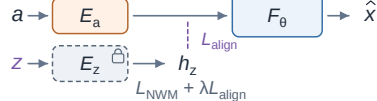

Step 1

Train E_a only

Step 2

Train all except E_z

Action2Latent

Map actions into the latent input space

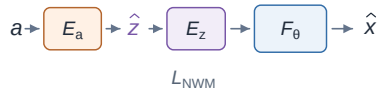

Step 1

Train E_a only

Step 2

Train all modules

Training-only teacher in Align; Action2Latent retains E_z at inference. Visual / diffusion inputs are omitted in (c).

EVALUATION Visual prediction · Navigation planning · Unseen-domain generalization
